

(By default, Android devices support 3gp, mp4, mkv, webm formats; iPhone - m4v, mp4, and mov)

Common Video Formats

3gp	low quality video, usually taken on your mobile phone;
avi	bigger videos usually have .avi extension and you watch them on your computer;
wmv	Windows Media Video, bigger filesize, higher quality, less compression;
mpg, mpeg	similar to avi;
mov	Apple format, mostly played via Quicktime player on your computer;
swf, flv	Adobe Flash formats, usually swf is for applications and flv for Internet videos;
mp4	Apple format, played on both iDevices and Androids;
m4v	iOS format;
mkv	high-quality video files, usually used to burn DVDs, Blu-Ray discs;
webm	high-quality video format for web usage;

Video Players

VLC Media Player (Windows, Mac, Linux)

<http://www.videolan.org/> - extremely popular cross-platform video player that can play almost any video file;
